SUMMARY

Software Developer, adept in time management and communication, transitioning from a healthcare background. Driven by a lifelong passion for technology and creativity. Seeking opportunities to apply problem-solving abilities and continual growth.

TECHNICAL SKILLS

Java | HTML | CSS | JavaScript | Spring Boot | Vue.js | JDBC | Table Design | SQL | PostgreSQL | E/R diagrams | Agile Unit Testing (JUnit) | Integration Testing | Git | IntelliJ

TECHNICAL EXPERIENCE

Typing Test Game

Developing a passion full stack typing test project following the MVC model. Basic features include: Timed typing test that captures WPM and accuracy. Leaderboard system. RESTful API function. User Login and Register with Authentication.

LanternDB | Video Game Database

Built a full stack web application in an Agile/Scrum environment as a final capstone project. Developed RESTful APIs, a dynamic frontend using Vue.js, and integrated PostgreSQL for database management. Applied industry best practices in unit testing and version control.

TEnmo Currency Exchange App

Pair partnered to institute a money share command-line interface app using Java and PostgreSQL, incorporating MVC design, building a REST API function tested with Postman, and securing transactions with user authentication for money transfers and account balance requests.

Vending Machine Application

Pair partnered to design an object oriented virtual vending machine command-line interface app using Java (IntelliJ) that displays inventory/stock from a file and accepts user input for depositing money and making various purchases.
